Phone 10, Chinook

F. Bassett will leave shortly for
Harrington, east of Blackie, where
he will have charge of the Inde-
pendent elevator.

On account of the recent rains
only about a thousand bushels of
wheat has been brought into the
local elevators so far this season,
but deliveries made have all grad-
ed a good No. 1.

Mr. and Mrs. A. W. Shand, of
Erskine, arrived in Chinook last
week. Mr. Shand will be in
charge of the Pioneer Grain Co's
elevator.

An unmasked bandit entered
the Bank of Montreal Elbow Park
branch, Calgary, yesterday after-
noon and made off with between
\$7,000 and \$8,000 in bills.

Four Killed In Electric Storm Tuesday

During the electric storm which
took place last Tuesday heavy
damage was done over the eastern
portion of the province, and the
storm left a track of desolation in
its wake.

Three men were killed near
Hanna and a girl near Youngs-
town during what is described as
the most severe storm the district
has experienced in years. The
lightning played incessantly for
about an hour.

The dead are: T. Engles, aged
62, farmer, of Hanna, Sam Engles,
his 16 year old son, and Alex
Dewar, of Hanna, farmer, about
35 years of age; and Violet Witt,
aged 16, of Youngstown.

When the storm started the
three men were working in the
harvest field on the Engles farm.
On the descent of the storm the
horses were unhitched and taken
to the barn. From this vantage
point the progress of the storm
appears to have been followed by
the men until a sudden bolt killed
them all instantly. The bodies
were badly burned in the fire
which destroyed the building.

After making an examination of
the remains of the men, Wednes-
day morning, Dr. S. W. Cross,
coroner for the district, decided
that an inquest would be unneces-
sary.

Five horses standing in the barn
during the storm, and two dogs
which accompanied the men, all
suffered instant death when the
bolt descended.

In the case of Miss Violet Witt,
of Youngstown, she was caught
in the fierce storm around 8 p.m.
Her death resulted from lightning,
which struck her as she was hurrying
toward her home for shelter.
The girl was widely known
throughout the district, having
attended school in the town for a
number of years.

At Runsey the storm was very
severe and accompanied by hail
stones of an unusual size, and
hardly a pane of glass was left
in the town. The storm caused 100
per cent damage among the crops
in that district.

Collholme Collections

Frances and Ruth MacDowell
are visiting at the Morrison home
for a few days.

Fred Hobson and Ed Davis
are heading the crop of N. D.
Morrison.

Johnny Poekins is working
with his combine at the farm of
A. Spreeman, while J. Duncan
and A. MacLennan are heading
at the former's place.

N. D. MacKinnon made a trip
to the Youngstown Flour Mill
last week.

Mr. and Mrs. Wm. Davis re-
turned from Calgary last week
with a car which they purchased
there.

The Prairie "Chickens" Rock
Club held their meeting last
Thursday at the home of Mrs. J.
C. Turple.

W. R. Morrison and C. B.
Brown were putting up hay with
Bill Shier last week.

Harvesting operations have
been going on in this district for
the past week and some good
yields are expected. The rain of
Sunday afternoon and Tuesday
night delayed operations for a
time, but warm and dry weather
will see the harvest in full swing
again.

Intantile Paralysis Reported In Village

A case of infantile paralysis was
reported to have broken out in
town last Sunday afternoon. The
doctor was immediately called on
the case and he had a small sup-
ply of serum on hand which was
at once used, and the patient is
now reported as feeling better.

In order that all precautions
shall be taken to prevent the
spreading of this dread disease,
the village council has put a ban
on all gatherings in the village.
The ban will include church, Sun-
day school, dances, and all social
gatherings as long as there is
danger of the disease spreading.

Heard Around Town

Leslie Clipsham, of Calgary, is
assisting John Bellman during
the harvest.

Mr. and Mrs. Wyatt, of Medi-
cine Hat, visited with Mrs. Loader
over the week end.

Miss Lillian Thorp, of Calgary,
is visiting at the home of her aunt,
Mrs. E. E. Jacques.

Miss Mable Young left Monday
morning for Medicine Hat, where
she intends visiting for two weeks
with friends.

E. J. Anderson, B.Sc., Sight
Specialist, will be in Chinook, at
the hotel, on Friday, August 29.
Eyes examined.

R. Hoy, of Mecheche, and H.
Hoy, of Delia, visited over the
week end at the home of their
cousins, the Lawrence Bros.

Mr. and Mrs. John Jack, of
Fillmore, Sask., and J. C. Cottrell,
of Cereal, were Sunday guests at
the home of Mr. and Mrs. W.
Lawrence.

Miss Evelyn Stewart, of Cal-
gary, arrived here Saturday morn-
ing and will spend a short vacation
with her father, D. J. Stewart, on
the farm.

Leslie Berry and mother, Mrs.
H. F. Berry, left by motor last
Monday morning for Montana,
where they will visit with relatives
for a week.

The Prairie Rock Club met last
week at the home of Mrs. J. C.
Turple. A most enjoyable after-
noon was spent. At the close a
dainty lunch was served.

Combines are being used quite
extensively this season in the cut-
ting of the crop in this district.
Cooley Bros., report the sale this
week of four John Deere combines
and one tractor.

Joe Massey brought in the first
load of 1930 wheat to be delivered
in Chinook. Last Thursday he
delivered this load at the Western
Canada Flour Mills, and it was
graded as No. 1.

Mr. and Mrs. W. A. Todd and
daughter, Miss Mae, left by motor
Monday morning for Hart Siding,
between Drumheller and Wayne,
where Mr. Todd will take charge
of the Alberta Pacific elevator.

Norman Jacques, the ten-year-
old son of E. E. Jacques, while
on a swing last Tuesday morning
fell to the ground, alighting on
his head, knocking him uncon-
scious for some time. He was
carried into the home of C. W.
Rideout, where he regained con-
sciousness. Mr. Jacques was soon
able to take him home and called
the doctor. The injury is not
of a serious nature, and Norman
is able to be around again.

The Russian Menace

Soviet Russia presents a menace to Great Britain, Canada, the United States, in fact, to all countries which depend for their prosperity upon a world export trade. The Russian menace of today is not one of impending war fought by armies and navies, rifles, cannon, tanks, battle airplanes, but of a great economic struggle for world trade and of the countries most likely to be seriously affected by such a struggle the British Commonwealth of Nations, and the United States come first.

Prior to the Great War it was frequently contended that war between nations were brought about by armament manufacturers and captains of industry seeking territory within which they might enjoy more or less exclusive rights of trading. The Great War itself, was, in the final analysis, caused by Germany's ambition to secure larger world markets and a greater colonial empire. The German navy was created for the express purpose of challenging the British navy with this very object in view. Germany failed, but in the Great War the old Russia of the Czars disappeared, and in its place there has arisen the Soviet Republics dominated by the communist workers.

The Soviet leaders are absolutely ruthless in their methods, inspired by the ideas of Marx, and spurred on by a belief that their ideas of government are the only right ones leading to freedom of the masses as opposed to all other forms of government which they hold are under the control of the hated capitalist classes. To the Soviet leaders all methods are right and fair if they will serve to accomplish their purpose. Hence the nature of the economic struggle now confronting the world.

Having seized the property of all the landed and capitalist classes of Russia, having declared it a crime for any person in Russia to hold views contrary to those of the Soviet authorities, and having imposed ultra-communistic ideas upon the whole of Russia, the Soviet leaders are now utilizing and working these seized, or stolen, properties with what is to all intents and purposes convict labor. And if there is any shortage of such labor, thousands more are made readily available by trumped-up charges of treason or disobedience to the Soviet, and without trial are thrown into forced labor camps.

Coal, pulpwood, agricultural products, notably wheat, produced under such conditions at a cost against which the producers of no other country can successfully compete, are now beginning to be thrown into the markets of the world. Some tens of thousands of tons of Russian coal have been shipped into Canada; scores of shiploads of Russian pulpwood are being sent to the United States to enter into competition with Canadian pulpwood, pulp and paper; Russian wheat is going to England where it displaces hard Canadian wheat and is largely of the same hard variety.

And this is only the beginning. The Russian Soviet Government has expended hundreds of millions of dollars within the last few years in the purchase of the most up-to-date agricultural machinery. It has granted concessions to Henry Ford to establish a great plant for the manufacture of tractors in that country; it has engaged the services of the most noted railway and agricultural experts to direct operations in Russia; it has sent commissions of its own experts to foreign lands, and has particularly to Canada and the United States to study methods of transportation and marketing, all with a view to making an aggressive bid for the trade of the world, and based on methods and costs of production with which other countries with their greater liberty of the individual and higher standards of living cannot begin to compete.

Such, in brief outline, is the serious nature of the menace to Canadian and United States business in the Russian situation. The United States labor and United States industrialists are strongly battling the unfair Russian competition. Canada must do likewise, for while a country may be willing to face the competition of other countries, both at home and abroad, upon equal terms, no country can compete with conditions such as those now prevailing in Russia and survive. It is apparent that Russia, having failed in its political attempts to sovietize the world, has now embarked upon an economic conquest.

Under these circumstances, the approaching Imperial Economic Conference, in London, England, is fraught with greater importance than any previous Empire Conference. Hon. C. A. Dunning announced that his budget was an indication of the spirit in which the King Government intended to approach that Conference, but the King Government has been defeated, the responsibility now rests with Premier Bennett, in collaboration with Premier Ramsay MacDonald, and the other Dominion Premiers, to work out an economic policy for the Empire which will enable all its component parts to successfully resist the Russian menace, and at the same time develop intra-Empire trade to its fullest possible extent. Every Canadian will wish Mr. Bennett well in his important task.

Deceiving the Customer

These Berry Boxes Were Worse Than the Standard False Bottoms

In the "museum" of the Dominion Fruit Branch, at Ottawa, is a curio of unusual interest. It is a full tray of twelve blueberry boxes, each box of which is nearly half-filled with blocks of board, bits of field trash and old wood. It was picked up by the inspection service through the complaint of a purchaser on a large Eastern market. To the customer to whom these boxes were sold it was a case of "caveat emptor" with a vengeance.

The French Government is being urged to rivet to the top of the Eiffel Tower a 22-foot flag tower, making it again the world's loftiest structure, a position now occupied by the Chrysler Building in New York.

He—"About a half mile from the crossing he put on a terrible burst of speed to beat the train to it." She—"And did he get across?" He—"Yes, they put one on his tombstone."

Crosses Canada On Bicycle

Young French-Canadian Wins Wager Of \$1,000 On Reaching Vancouver

Noel March, young French-Canadian from Halifax, wheeled his battered bicycle into Vancouver, on August 5th, and won a wager of \$1,000.

March left the Atlantic coast April 15, with \$15 in his pocket and a supply of food on the crossbars of his bicycle. He was to reach the Pacific before midnight, August 15.

Notwithstanding the fact that he wheeled his machine into a ditch near Lyttton and spent two weeks in a deserted shack with an injured back and leg, the wiry little Canuck reached his goal one week ahead of time.

Have Minard's Liniment on your shelf.

Production Of Cordage

According to a report by the Dominion Bureau of Statistics, the total value of production in the cordage, rope and twine industry in 1928 was \$11,798,165. This compares with \$10,859,991 in 1928, the increases in value being \$938,204, or 8.84 per cent.

An honest man is one who says, "I don't know," instead of saying: "Look it up yourself, son, and you'll remember it better."

A good home is worth all you put into it in time, money and effort.

Agricultural Wealth Of Canada

Gross Agricultural Wealth Of Dominion Nearly Eight Billion Dollars

The gross agricultural wealth of Canada for 1928 is estimated at approximately \$7,978,033,000 in a summary published recently by the National Revenue Department.

Last year the total revenue from agriculture was \$1,667,213,000, of which Ontario accounted for \$509,434,000; Quebec, \$320,422,000; Saskatchewan, \$309,308,000; Alberta, \$228,589,000; Manitoba, \$134,095,000; British Columbia, \$55,235,000; Nova Scotia, \$43,558,000; New Brunswick, \$39,854,000, and Prince Edward Island, \$26,723,000.

The two principal items which go to make up the total of agricultural revenue are field crops, valued at \$776,760,000, and dairy products with an estimated value of \$290,000,000. Farm animals are third with a value of \$210,437,000, and poultry and eggs fourth with a value of \$109,346,000.

Was Run Down Now Well Again

Takes Pleasure In Recommending Dr. Williams' Pink Pills

To the woman in the home illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she is easily tired, is depressed and nervous and has no appetite. In a word she is anemic and badly needs help—the health-help that only Dr. Williams' Pink Pills can give her. These pills make rich, red blood which brings new strength and energy to weak, depleted sufferers. Concerning them, Mrs. Paul Rall, Coin du Banc, Que., says: "I was badly run-down, slept poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt miserable. I took six boxes of Dr. Williams' Pink Pills and they completely renewed my health."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Remarkable Invention

Teletypewriter Designed To Speed Up Newspaper Production

Successful use of the teletypewriter, one of the newest inventions designed to facilitate newspaper making, was announced by West Chester County Publishers' Inc., West Plains, N.Y., headed by J. Noel Macay.

Seven newspapers in the country are using the instrument, by which news stories are sent out on telegraphic impulses and almost simultaneously translated into type, ready for publication.

Readers of the Yonkers Statesman, Mount Vernon Daily Argus, New Rochelle Standard-Star, Port Chester Daily Item, Tarrytown Daily News, Ossining Citizen-Sentinel and White Plains Daily Press thus are enabled to peruse more late news "breaks" than hitherto has been possible. Speed, ever an essential in journalism, is vastly increased.

The instrument was invented by Walter W. Morey and developed by the Collaboration of Edward E. Kleinschmidt, Frank E. Gannett and others.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

British General Election

Mrs. David Lloyd George, speaking at a garden party in Wales, prophesied that there would be a general election in the coming autumn. Her hearers were much intrigued by the statement, in view of the key position occupied by the speaker's husband, Liberal opponent in Parliament of the Labor Government.

A letter carrier invented the first screw-propeller for steamships; an undertaker invented the slot-machine (telephone); and a barber first thought of fire-escape.

Air Pilot:—"By Jove, I forgot to give you a parachute." "Ginsberg:—"S all right. It ain't goin' to rain."

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

MINARD'S
"KING OF PAIN"
LINIMENT

SHAMROCK V.

Sir Thomas Lipton's yacht "Shamrock V." reported from Horta, Azores Islands, missing five days by steam yacht "Erin," which was escorting it to Newport, U.S.A., for America's Cup race, and lost sight of in rain squall, but now safe.

Abolish Tariff Advisory Board

New Body To Be Constituted Under Authority Of Act Of Parliament

The Tariff Advisory Board has been abolished and will be replaced by a new body to be constituted under authority of an act of parliament. Announcement to this effect was made by Premier R. B. Bennett.

The board now existent was constituted by an order-in-council, and not through statutory legislation, in April, 1926. This order-in-council has been cancelled by the new government, and the body to be created will function under authority granted to it by both the House of Commons and the Senate. Legislation for the establishment of the new board will be drafted shortly, and will likely be introduced at the next session of parliament.

The abolished board began its work early in May, of 1926, with Senator Geo. P. Graham as chairman, and Alfred Lambert, Montreal, with D. G. McKenzie, now a member of the Manitoba government, as associate members. Following the resignation of Senator Graham, W. H. Moore became chairman of the board; and Mr. Lambert and Mr. McKenzie who resigned, were replaced by Hector Raouin, Montreal, and Frank Jacobs, De Winton, Alberta. Mr. Moore resigned on the eve of the general election to the constituency of Ontario, in which he was elected as Liberal Candidate. The chairman of the board was in receipt of a salary of \$10,000 per annum, and his colleagues \$4,000 yearly.

Relief From Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choked tubes of the human respiratory system? It is a most automatic affliction a thing of the past for thousands. It never fails. Good suggestions everywhere have said it for years.

Empire Preference

London County Council Gives Preference To Empire Products

There is special interest for Canadian farmers in a communication received by the Dominion Department of Agriculture from a London, England, buyer of foodstuffs. "The London County Council has laid down for some time past now that preference shall be given to Empire foods. In furtherance of this policy it has given permission to those responsible for buying foods to pay up to 10 per cent more for an Empire article than for a similar quality foreign product," he states. The London County Council provides food supplies to over 80 large hospitals and 70 institutions of various kinds.

For all Skin Abrasions—Minards Liniment.

B.C. Industrial Conditions

The industrial payroll of British Columbia, for 1928, is estimated at \$192,092,248, a new high record, in the annual report of the provincial department of labor, the most accurate thermometer of industrial conditions in the province, as issued recently. The total is an increase of \$8,994,462 over the 1928 figure.

A thousand American chefs have chosen petit maitre, poitrine de volaille, pommes-de-terre olivette, bombe surprise, and Mocha filite for their annual banquet.

In other words, soup, fried chicken and hashed potatoes, icecream and coffee!

Seedy (reading)—Say, Hank, Hank—What, don't yer know wot er haberdasher is? Didn't yer ever have no learnin'? A haberdasher is er man wid' a habit of dashin' about.

Her Three Children

Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Live Stock Sales

New System Of Reporting Sales and Prices Has Been Adopted

A new system of reporting live stock sales and prices has been put into effect in the Stock Yard and Market Reporting Services of the Dominion Live Stock Branch. The purpose of the new system is to afford a more adequate indication of sales and prices in relation to beef cattle coming on the market. The principal change brings to the top of the list the section of beef cattle in greatest demand, providing a clear indication of the volume and price range of the popular light cattle, and providing the producer with a more adequate indication of grade and price than was possible under the old system.

Earthquake Area Extended

Heavy Loss Of Life Reported On Shores Of Caspian Sea

A terrific earthquake killed 500 persons and injured 4,000 others on the northeast shores of the Caspian Sea, a Rigas dispatch to the London Morning Post states.

The towns of Tchapaev and Vritzy were reported destroyed. The bodies of 30 children were recovered from the ruins. A children's home at Tchapaev was destroyed by the shocks, the Morning Post report said.

The dispatch said 200 houses at Tchapaev were razed, and the church destroyed by the quake.

The Ural River was reported to have flooded the town.

Keep Douglas' Egyptian Liniment markable in its attack—o-ETSH always in the stable, ready for immediate use. Removes gross flesh and inflammation, Thrush or Hoof Rot, and infection of cow's teat.

Says Theatres Are Doomed

George Bernard Shaw Says Talking Pictures Usurping Legitimate Stage

The doom of the theatre has been sealed, George Bernard Shaw said recently, upon signing his first talking picture film contract calling for the filming of his play, "How He Lied To Her Husband."

"I am afraid the poor old theatre is done for," Shaw said. "The theatre may survive as a place where people are taught to act; but, apart from that, there will be nothing but the talkies."

"All my plays will be made into talkies before long. I signed the contract today because I wanted some money."

"Shaw said 'Arms and the Man' probably would be filmed next. It is one of his more famous comedies."

Don't Let Foods Stale

Foods that ordinarily stale quickly stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

A Challenge To Canada To Put British Empire In Forefront Of Airship Transportation

A challenge to Canada to take the next step in putting the British Empire in the forefront of airship transportation through the inauguration of a trans-Atlantic service between Great Britain and Canada before the service between Germany and the United States, being planned by Dr. Hugo Eckener, gets under way, was voiced recently by Sir Dennistoun Burney, designer of the dirigible R-100. Sir Dennistoun spoke before the Canadian Club, of Ottawa.

The sponsor of the first Great Britain-to-Canada airship flight asked for the formation of a committee of prominent Canadian business men to investigate the situation and whether the Canadian Government and business interests were prepared to back a trans-Atlantic airship service. With the views of such a committee before him, he would be able to lay a concrete proposition before the British Government on his return to London, England.

He was prepared, he said, to undertake at once the construction of an airship with a cruising speed of 85 miles per hour, carrying fuel for a 6,000-mile flight together with 100 passengers and 10 tons of mail. With a fleet of such vessels a regular service between Canada and Great Britain could be maintained, taking 2 1/2 days for the westward crossing and two days for the eastward. He named \$1,000 as the initial passenger fare, but predicted a gradual reduction until it would compare favorably with steamship fares.

It was time to take a bold forward step, Sir Dennistoun asserted. If the British Empire was to be knit together culturally, economically and politically, a rapid means of communication had to be provided. A service to Canada offered better immediate prospects of success than the proposed eastward service to India and Australia.

Before the proposal could be put in effect, he said, there were financial and political handicaps to be overcome. Referring to the presence of Mr. Bennett and Mr. King, he said with the co-operation of both parties the political difficulties would disappear. On the political side, he mentioned the necessity of long-term mail contracts and building loans at reasonable interest rates. On the financial side, all that was required was money, and if the business men of Canada got behind the scheme there would be no difficulty. There were no technical difficulties.

Dr. Hugo Eckener, designer of the Great Zepplin, Sir Dennistoun said, was organizing a German-American company to operate a service between Germany and the United States. If Canada would co-operate the Canadian service would be in operation before the German.

"We could promise equality of service by establishing an emergency base some hundreds of miles south of Montreal," said Sir Dennistoun. "Would it not be a great thing for Canada, if, during the winter months, mails and passengers could leave Toronto or Montreal en route to London, England, in 48 hours? Now that the R-100 has flown to Canada, you can see it for yourselves. The commercial interests of Canada and the Canadian government have some solid basis on which to form their judgment."

"I want a revolver—for my husband."

"Did your husband say what make of revolver?"

"No, but I don't think that matters. He doesn't even know I'm going to shoot him."

Hurricanes in the West Indies sometimes bring to some of the small islands birds never before found there.

Frozen-egg plants in Shanghai, China, are operating at capacity.

"It could have had a fine job; £25 a month with a fortnight's holiday with pay."

"And what came of it?"

"Nothing. I wanted the holidays before beginning."—Pages Gales, Yverdon.

W. N. U. 1851

For Airship Travellers

Shower Baths Will Be One Of The Comforts To Be Installed

Shower baths are seen as one of many comforts for airship travellers. The future by Sir Dennistoun Burney, who addressed the Advertising Club of Montreal recently.

On her flight to Canada, the R-100 gathered 4 1/2 tons additional water from rain and cloud moisture. This involved a saving of \$12,820.50 worth of hydrogen gas, since ordinarily the captain is forced to release hydrogen to compensate for the loss in weight of gasoline fuel as it is consumed.

Helium, a non-inflammable lifting gas, is preferable to hydrogen for use in airships, according to airship experts. Canadian geologists say that geological formations in the neighborhood of Hudson's Bay and Labrador indicate strong possibilities of producing helium, which is extremely favorable to any airship service between Europe and Canada.

Shaw's Early Literary Effort

Nearly One-Seventh Of Canada Lies Being Published For First Time

George Bernard Shaw, who began his literary career as a novelist a half century ago before turning to playwriting, is to appear again in the role of a fictionist. The dramatist's first novel, written 41 years ago, but laid aside when a publisher could not be found for it, is to appear in September, it was disclosed by William H. Wise, New York publisher.

This early work will be included in a collected set of Shaw's writings, the first five volumes of which will appear simultaneously in London and New York. The author was 23 years old when he penned "Immaturity," which was published in 1884, by some 60 British and United States publishers.

(By Anabelle Worthington).

This little caplet frock may be for playtime or for "dress-up" occasions, according to the fabric chosen for its development.

It's very French! It closes at either shoulder 'neath the perky bows. The scallops provide effective trim. It is butter-cup yellow organdie. The scallops are accented by bias organdie in soft cocoa brown shade. The bows of taffeta ribbon match the binding.

It's very quaint and pretty in tiny checked gingham in cream and white with scallops bound in plain orchid. The bows are omitted and replaced with two decorative ball-shaped pearl buttons at either shoulder.

Style No. 2549 is designed for wee maids of 2, 4 and 6 years. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Experiment With Reindeer

To Supply Natural Source Of Food For Eskimo Of Northern Canada

The re-stocking of the Canadian Arctic to supply a natural source of food for the Eskimos, is engaging the attention of the North West Territories and Yukon Branch of the Department of the Interior.

A. E. Forsild, who investigated the possibilities of the Western Arctic as a home for reindeer, has left for the west coast of Hudson's Bay, on a similar mission.

Mr. Forsild and his brother, R. T. Forsild, were commissioned by the Government, some years ago, to carry out an investigation in the western Arctic, to ascertain whether the country produced enough moss, lichens and other reindeer fodder, to support these animals in any number. The brothers reported favorably, and the Government bought 3,000 head from Loman Brothers, of Alaska. These reindeer are now on the long trek round the northern corner of the continent, bound for Kittigazuit, at the mouth of the Mackenzie River.

The Canadian Government saved the buffalo from extinction from North America by similar measures years ago, and now has so many buffalo that they are being distributed all over the North West. It is hoped that the same success will attend the reindeer experiment, and that the natural increase of the Kittigazuit herd will enable the stocking of the territory west of Hudson Bay. The latter problem depends on the herbage of the area north of the so-called barren lands.

Eskimos Play Golf

Ancient Scottish Game Introduced To Natives North Of Churchill

Eskimos play golf—not a variation of the game like "African golf" but the real thing as practiced in Scotland.

Rev. Donald Marsh, graduate of Emmanuel Theological College, Saskatoon, who has already spent three years as a missionary to the Eskimos, has gone north again after a holiday.

Rev. Mr. Marsh introduced the game at Eskimo Point, 200 miles north of Churchill, last year. This time he took a stock of golf clubs, balls and tees with him.

Goes To Japan

Miss Beatrice Shand, Of Montreal, To Be In Charge Of Tokio School

Miss Beatrice Shand, of Montreal and Toronto, has been chosen principal of the international school for children of foreign residents at Tokio, Japan. Miss Shand will take up her duties upon the opening of the fall term, September 15.

Miss Shand is a graduate of Acadia College, Wolfville, N.S., and has taken post-graduate courses at McGill University, Montreal. She is also a graduate of Miss Hunter's school for kindergarten training of New York.

To Inspect Fisheries

Hon. D. G. McKenzie, Minister of Natural Resources, for Manitoba, is travelling north to inspect fisheries of the province. His visit will touch stations, properties and fish ladders along the shores of lakes Winnipeg, Manitoba, and Winnipegosis, and adjacent waterways.

You are no longer young if you still desire to read a book after somebody tells you it is instructive.

TEE OFF WITH BOW AND ARROW

The arrow beat the golf ball to the cup in a contest staged recently on the Banff Springs Hotel Golf Course, when Yed-Wah Monee (Lone Walker), and Umbiska Wah-Zhee (Lone Eagle), lined up in a foursome against William Thomson, professional of the course, and his daughter Mrs. Peggy Dalgleish, former Alberta Lady Champion, over nine holes. The Indians used bow and arrow while the golfers played with the usual clubs and ball. On the green the Indians shot at a four-inch disc set upright on the cup. Both sides were even at the eighth, and then the Indians won on the ninth. The unique contest excited much interest and enthusiasm among the hotel guests, who formed a large gallery following the play.

Judges For Community

Progress Competitions

Competitions Among Rural Communities In The Three Prairie Provinces

Outstanding men and women, conversant with conditions throughout the prairie provinces, have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of \$1,000, \$500, and \$250, respectively, to be awarded each year in each of these provinces.

The judges are: Manitoba, Dr. John Mackay, Principal, Manitoba College; Brother Joseph Fink, Principal, Provencher School, St. Boniface, and Mrs. David Watt, Birtle, who has long been prominent in women's institutes. Saskatchewan: Dr. W. C. Murray, President, University of Saskatchewan; Dr. W. J. Rose, Department of Sociology, Dartmouth College, Hanover, N.H., and Mrs. Violet McNaughton, organizer and president of the Women's Grain Growers' Organization in Saskatchewan, and editor of the women's section, Western Producer, Saskatoon. Alberta: Dr. R. C. Wallace, President, Alberta University; Dr. W. H. Fairchild, Superintendent, Expansion Farm, Lethbridge, and Mrs. R. B. Gunn, Lloydminster, prominent in the women's section of the Grain Growers.

The community which, through the co-operative action of its people, shows the best schools, the most regular attendance of pupils, the largest percentage of children going on for secondary or university training, and takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, and enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home makers' clubs, libraries, etc., or which evinces the greatest interest and reveals the greatest progress in the improvement of agricultural methods, will be the winner of these substantial prizes.

Saskatchewan Fur Farms

Now 222 Registered Fur Farms In The Province

Rapid increase in the number of fur farms in Saskatchewan is indicated in a recent statement issued by the provincial game branch. There are now 222 registered fur farms being operated in the province, 101 of which are fox farms. Under provisions of the Game Act, such farms must operate under a govtch license and permit considerable inspection.

The number of farms of each species of fur-bearers follows: Fox, 101; badger, 64; mink, 59; muskrat, 41; raccoon, 13; coyote, 13; rabbit, 8; fisher, 3; beaver, 3; skunk, 3; martin, 3; weasel, 3; bear, 2. In addition, four fur farms are being operated, while 20 are pending.

The Interpreter

"Do you believe in dharmes, Riley?"

"O! do," was Riley's reply.

"That's it! A sign of it! A married man dharmes he's a bachelor!"

"It's a sign that he's going to meet his great disappointment when he wakes up."

Carisbad Caverns are no longer a National Monument but are a National Park.

The average income of people of the Philippines is \$35 a year.

Canada's Claim To Arctic Area Between Mainland and Pole, Will Be Jealously Guarded

Registered and Certified Seed

New Regulations Are To Apply At Royal Winter Fair

An important forward step to promote the commercial production and distribution of registered and certified seeds in Canada has been taken by the Royal Winter Fair, to be held in Toronto, November 19 to 27. A new class has been added to the Royal program for seed growers of wheat, oats and barley, confined to one-half bushel sample and crops have been inspected in the field under the provision of the Dominion Seeds Act and who have not less than 50 bushels of registered and certified seed grain for sale in a commercial way. The actual exhibit will consist of one-half bushel sample and may be taken from the current crop or that of the previous harvest.

By the new conditions the prize winning half bushels must come from a 50 bushel bulk of the same quality and must be entered in the Dominion Seeds Act. An accredited inspector at the time he inspects and seals the bags or other containers of the main commercial crop. Briefly this means it will be possible for farmers to buy seed grains by sample with official assurance that the bulk will equal sample. Prize winning in the past did not give this guarantee, because entrants could hand pick the best half bushel from a large quantity of mixed grain. Over 80 prizes are offered.

The spring wheat classes include the Marquis group, Carleton Place, Huron and Minidum. These varieties of winter wheat, oats and barley approved for registration are eligible. Barley may be six-rowed or two-rowed. The 1930 dates for the Royal Winter Fair are November 19 to 27.

Raspberries Yield Well

Grows In Wild State From Coast To Coast In Canada

Horticultural experts of the Dominion Department of Agriculture are authority for the statement that the raspberry is easily the most important bush fruit grown in Canada, and among the small fruits it ranks second to the strawberry. The annual production amounts to some 2,500,000 quarts, having a selling value of roughly \$500,000. This does not take into consideration the production from city lots and back gardens which is very considerable in volume.

At a production rate of 1,500 quarts per acre it would take at least 1,500 acres to produce this crop, and including new plantations the area planted to raspberries is close on 2,500 acres. British Columbia is the leading raspberry producer, with Ontario a close second. The raspberry is not a commercial crop in Nova Scotia or the Prairie Provinces, but it is cultivated to a profitable extent in every Province of the Dominion, and grows wild from coast to coast and as far north as the delta of the Mackenzie River.

How We Spend Our Time

Estimated That a Man Of Seventy Has Spent Two Years Of His Life Shaving Himself

A Frenchman with a liking for curious figures has been counting up the time that a man ordinarily devotes to common occupations of life. He finds that a man of seventy has usually spent about nineteen years working, twenty-three years in bed, nine years amusing himself or being amused, one year in church, and two years shaving himself. This last portion of time he seems to consider as one of the great wastes of life. But, trying to imagine what we would look like if we all had beards, we are not inclined to agree with him. Even if we did all save some time from shaving there isn't any real guarantee that we would put that time to any better uses.—New Outlook.

Nothing To Fuss About

During the hearing of a case a man began clattering about in the back of the court room, pushing over chairs and generally upsetting things.

"Young man," said the judge, who had a reputation for ironic wit, "you are making a great deal of noise."

"I have lost my overcoat, your worship," said the agitated young man.

"Well, well," retorted the judge, "people often lose whole suits here without half as much disturbance."

Czecho-Slovakia is developing its air express service.

Roanoke, Va., has the largest rayon plant in the world.

Canada will watch with a "jealous eye" anything resembling a design on the part of a foreign power to establish itself within the zone lying between her mainland and the North Pole, P. E. Corbett, dean of the law school of McGill University, said before the Institute of politics.

Dean Corbett, who addressed the conference on "Problems of Sovereignty in the Arctic and Antarctic," stated that Canada claims all discovered land lying between her mainland and the North Pole, and will probably assert a claim to any land that may subsequently be discovered there.

"Where occupation is not yet possible the Canadian claim is justified by principles of territorial proximity and possible strategic importance," he said. "These principles have never hardened into rules of international law, but they have been urged from time to time against Great Britain and if not legal, grounds for the appropriation of unattached lands."

"At the present time, the main interest in the Arctic is its position as the possible future highway of inter-hemispheric air traffic. The shortest way between Great Britain and the western part of Canada is across these northern latitudes, and the same is true for the northwestern United States and northern Europe. Landing and refuelling stations along the route will be a prime necessity and if such stations in our northern hinterlands are to be within control of any one power that control ought to be Canadian."

Dean Corbett stated that the question of internationalising the polar regions may arise if expected development in aerial navigation takes place, but that the United States has hitherto displayed slight enthusiasm for such a project and without her it would be foolish to think of any such regime in polar regions.

"In the meantime," he said in conclusion, "Canada, which has what may be regarded as a legitimate expectation of graduating within the next half century into the ranks of the first-class powers, will be bound to pay careful attention to developments in the Arctic, watching with a jealous eye anything resembling a design on the part of a foreign power to establish itself within a zone which we regard as belonging by right to us."

Value Of The American Hen

Poultry Industry Supplies About 10 Per Cent. Of The Total Income

The cow, the sow and the hen are greater farm-income producers, according to United States official rating, than wheat, about which we hear so much nowadays. The poultry industry, that "mere sideline" which so many farmers neglect, supplied about 10 per cent. of the total income of American farms during 1928. The egg sales were estimated at \$171,000,000 and the sales of chickens brought in \$458,000,000—a total for the poultry industry of \$1,175,000,000 as compared with a total farm income for the nation of \$11,827,000,000. These figures do not include the value of chickens and eggs consumed on the farms—an item which doubtless would itself run into seven figures.

Of Special Interest

The research work of the Health of Animals Branch of the Dominion Department of Agriculture is attracting international attention, particularly in relation to the control and eradication of Tuberculosis, and the control of Bang's Disease. With the members of the British Medical Association visit Canada this summer their itinerary includes a day to be spent in the new laboratories of the Animal Diseases Research Institute at Hull, P.Q.

WORLD HAPPENINGS BRIEFLY TOLD

James R. Layton, of the Ontario Agricultural Development Board, died at his home, in Toronto, aged 65.

The King conferred the Order of Commander of the British Empire on Miss Amy Johnson, at Buckingham Palace, recently.

A commercial treaty between Hungary and Roumania has been signed. It is based upon the most favored nation policy.

Motor bus competition has caused the closing recently of 36 railway stations of one road in England for lack of use.

Mary Pickford, Vilma Banky, and Rod La Roque, motion picture stars, will appear in Broadway stage plays this fall.

A \$20,000,000 power development contract on the Abitibi Canyon site, 85 miles north of Cochrane, on the T. N. O. Railway, has been let to the Dominion Construction Company.

The Chinese Press reported that 1,000 persons had died in floods between Peking and Mukden. Twenty towns were flooded, 10 bridges washed out and traffic disrupted, it was said.

John A. Embury, formerly assistant commercial attaché at Vienna, Austria, has taken up his duties as United States trade commissioner for the prairie provinces, at Winnipeg. He succeeds Charles E. Brookhart, transferred to Washington.

E. W. Sheets, of Washington, chief of animal husbandry, United States Department of Agriculture, said recently that the drought has resulted in so much livestock being thrown on the market for slaughter that the American dollar buys more meat now than at any time during the past 12 years.

Make Good Soap

Soviets Make Toilet Soap From Rats, Mice and Other Things

Who would have thought before the days of the Soviet, that dead rats, mice and marmosets would provide Moscow with a popular toilet soap called "My Grandmother's Bouquet"? That is what the corpses of those creatures are now destined for.

Soap must be made, says the Soviet, from cats and dogs, too. One cat, boiled down, gives five ounces of fat, one dog more than a pound. The dead pets and slain pests of the community in general will yield, it is estimated, 5,000 tons of fat for soap.

Saskatchewan's Exhibit

Saskatchewan's contribution to the Canadian live bird exhibit at the World's Poultry Congress, in London, England, is made up of 33 fowl and five turkeys according to F. Hedley Auld, Deputy Minister of Agriculture. The exhibit was assembled at the University of Saskatchewan.

Canada Telephones

Latest statistics issued by the Bell Telephone Company show Canada has the fourth largest number of telephones among the countries of the world. There are 1,334,534 telephones in use throughout the Dominion, or 13.7 for each 100 of population.

One hundred and sixty-one peaks in the Canadian Rocky Mountains rise above 10,000 feet.

It is better to meet a bill than the collector later.

Mining Men Gather At The Pas

Annual Western Meeting To Be Held In Northern City

Mining men from east and west will renew old acquaintances on September 2nd, when members of the Canadian Institute of Mining and Metallurgy will gather at The Pas, on the occasion of the annual western meeting which is being held this summer in the first city of the North. Headquarters for the visiting men will be a Canadian National Hallways train, which will provide sleeping accommodation together with dining facilities while the conference lasts. Side trips to Sheridon and Flin Flon will be made, and the Sheridon-Gordon and the Hudson Bay Mining and Smelting Company mine inspected.

Among those who have intimated their intentions of attending the meeting are: L. L. Boulton, M.A., B.Sc., Assistant Deputy Minister of Mines for Canada; C. H. Attwood, Deputy Minister of Mines and Natural Resources for Manitoba; John McLeish, B.A., F.S.S., director, Mines Branch; A. W. G. Wilson, chief, Division of Mineral Resources, Mines Branch; A. Buisson, engineer, Mines Branch; Prof. T. L. Walker, University of Toronto; R. C. Rowe, editor, Canadian Mining Journal; J. McEcheran, superintendent, Bank of Montreal, Winnipeg; J. D. Flock, New York; F. V. Siebert, superintendent, Manitoba and Saskatchewan, Department of Natural Resources, Canadian National Railways; J. S. Morrey, Winnipeg; T. W. Edgar, Winnipeg; C. G. Young, F.R.C.S., Canadian National Railways, Toronto; J. W. Holmes, Montreal, and F. H. Edmonds, Saskatoon.

2548

Here's a charming wearable frock of white gingham and white. It will give young daughter a big thrill to make it, for it isn't half as intricate as it appears. It is a straight one-piece affair lengthened with a circular flounce. The white organdie frill at neckline and sleeves may be bought at pleated by the yard.

The belt is adjustable and may be worn as best suits the wearer. If daughter is very slim, the higher waistline is extremely smart.

Style No. 2548 may be had in sizes 12, 14, 16, 18 and 20 years. Shantung, linen and printed dimity are other lovely ideas. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

A man never realizes his wife's superiority until he attempts to put a crying baby to sleep.

Did you ever notice that those who know the least are the most liberal in handing out advice?

VESUVIUS ON RAMPAPE

Residents at the foot of Mt. Vesuvius are alarmed as the volcano's activity increases after renewing its eruptions.

The eruptions are scarcely more than are customary during the spring activity at the most severe periods but the memory of the recent earthquakes added to the dread of the natives.

The volcano presented a spectacular picture at night, as occasional tongues of flame rose to the sky.

Hope For The Blind

Work Of Royal Commission May Prove Of Great Help To Sightless

The blind people of Manitoba and Saskatchewan are looking with much eagerness to the recommendations of the royal commission now investigating their situation, said Dr. Baxter Lawley, worker among the blind and without vision himself, who testified before the commission on assistance given to blind people in the British Isles.

Mr. Lawley, who comes from near Manchester, is a notable example of a man who has mastered the disadvantages and sorrow that followed the losing of his vision, and now is an enthusiastic and capable worker in the interest of those who are handicapped by blindness in the fight for existence.

In December, 1913, he was blinded in a dynamite explosion in a gold mine at Headley, B.C. Sensitive of his weakness, overcome, almost despairing of the future, Mr. Lawley passed through Winnipeg during June, 1914, on his way to the Old Country. He tells how, unable to find his way around, afraid to grope in the darkness into which he had suddenly been plunged, he travelled for six days and seven nights on a diet of sardines and crackers.

Seeking the aid of specialists on his arrival in England, he studied Braille in hospital, and learned to read classic Greek in Braille. In 1915 he gained a realization of the plight of blind people, and he threw himself vigorously in an effort to improve their lot. He became associated with the late Sir Arthur Pearson, Bart, and was successful as a financial organizer and lecturer.

Later he became an official and later president for two years of the National League of the Blind, in Great Britain and Ireland, and was one of the leaders of the famous march to London, in April, 1920, of 250 blind men from Manchester, Leeds and Newport. They interviewed the leaders of the then coalition cabinet, and were successful eventually in securing substantial relief for blind people.

In 1923 he met Philip Layton, Montreal, a noted blind philanthropist, founder of the Canadian National Institute for the Blind and of the Montreal school for the blind, with whom he carried on a correspondence for a number of years which eventually led to an invitation from Mr. Layton to come to Canada to engage in relief effort for the blind people of the Dominion. His home is now in Toronto. He is in Winnipeg assisting A. B. Howe, a local colleague, in connection with the investigations of the joint commission that is investigating the status of the blind in Manitoba and Saskatchewan.

Discussing the work of the commission, Mr. Lawley said he had been much impressed with its progress thus far, and was convinced that it could not have been undertaken at a better time. Its findings would have an effect on every province in Canada, and eventually would influence the Federal Government. He predicted an improvement in the lot of the blind as a result—Free Press.

Isolates Gout Germ

American Physician Makes Important Announcement To Paris

The theory that gout is a germ disease and not caused by deficiency of iodine, as claimed by physicians during the past 50 years, was advanced by Dr. E. O. Houba, of Tacoma, Wash., in a speech before the first International Microbiology Congress at Paris.

Dr. Houba said he had succeeded in isolating the gout germ during experiments conducted over a period of five years, and that he had proved that it was possible to cure cases with vaccine if caught in their early stages.

Fifty microbiologists representing 20 countries were present at the session of the congress; at which Prof. Jules Bordet, director of the Pasteur Institute, of Belgium, presided.

Recipes For This Week

(By Betty Barclay)

DUCK AND ORANGE SALAD

(Serves 6-8)

2 cups cold duck cut in small pieces.
4 oranges.
½ cup salad oil.
1 tablespoon lemon juice.
½ teaspoon salt.
¼ teaspoon pepper.
¼ teaspoon paprika.
Lettuce.
Cut the duck into small dice. Peel the oranges and slice very thin. Mix oil, lemon juice and seasonings until well blended. Pour this dressing over the duck and oranges and allow to stand for a few minutes. Serve on lettuce with additional dressing of any desired kind, if necessary.

GEORGETTE PUDDING SAUCE

2 eggs,
2½ tablespoons sugar.
Juice ½ lemon.
1 tablespoon water.
Grated rind ¼ lemon.
Beat yolks of eggs until thick and lemon-colored, beat in one and one-half tablespoons sugar, add lemon juice and rind and boiling water, and cook in double boiler, stirring constantly, until thick and creamy. Beat whites of eggs until light; then beat in gradually the remaining sugar. Combine mixtures; cook one minute; stir occasionally until cool; use on cottage pudding, or serve as a dessert in small glasses, lined with lady-fingers or thin slices of sponge cake.

Thomas W. May, veteran civil engineer, who, as a young student at Edinburgh University, was a classmate of Robert Louis Stevenson, died recently at Charlottetown, P.E.I., at the age of 88 years. He had been employed for nearly 60 years with the Island Railway and the provincial government. A native of the Channel Islands, Mr. May came to Prince Edward Island as a young man and was one of the first surveyors of the Prince Edward Island Railway.

Johnny, what are you doing in the pantry?
Johnny—Oh, just putting a few things away.

SUNDAY SCHOOL LESSON

AUGUST 24

JONATHAN AND DAVID—A NOBLE FRIENDSHIP

Golden Text: "He that maketh friends, maketh himself a friend to his own destruction; But there is a Friend that sticketh closer than a brother."—Proverbs 18:24.
Lesson: 1 Samuel 18:1-4; 19:1-7; Chapter 20; 2 Samuel 1:17-27.
Devotional Reading: 1 Corinthians 13:4-13.

Explanations and Comments

The First Meeting Of The Two Friends, 1 Samuel 18:1-4.—David's victory over Goliath not only brought about the defeat of the Philistines, but gained for him a position at court and the devoted friendship of Jonathan, Saul's son. Abner, the captain of the army, brought the presence and Saul would not let him return to his father's house. Jonathan was present at David's coming, and at once a beautiful friendship sprang up between the two. They made a covenant, exchanging presents. Nothing was too good for his new-found friend, Jonathan thought, for he loved David as his own soul; slipping off his own robe he gave that and all his apparel, even to his sword, bow and girdle, to David. It is to David's credit that he loved Jonathan, but far from Jonathan's interest to love David. Yet Jonathan, in every outstretching of a protective hand, was stripping himself of a royal garment.

"The prime gain of friendship is just the knowledge of a noble soul. That was what Jonathan felt. David won Jonathan's heart on the day when he stood revealed in all the richness of his regal nature—that day when Goliath was slain. David was proved to be the grandest man of Israel, fullest of patriotism and beauty, courage and skill, and all his qualities were adorned and set off by his humility. As you read the subsequent history of that friendship you are very apt to think that David was the gainer, for Jonathan was a perfect miracle of tenderness, and was never weary of sacrificing himself for the interests of his friend; yet I conceive that that would be false judgment. I am certain of this, that Jonathan would not have agreed to it. David was by far the more splendid nature, and he had more of what determines which is the gainer in a friendship. It is the man who has most in himself to give who gives most, not the man who has most of what is external to give."—James Stalker.

Will Muddle Through

Great Britain Will Overcome Present Era Of Depression

It is not the first time Great Britain has been forced to overcome depression and, as in the past, the mother country will overcome the present era of industrial and labor depression, said Walter Citrine, general secretary of the British Trades Union Congress, who was tendered a civic reception and dinner in Toronto. Great Britain has retained a full share of world trade throughout the period of depression, he stated, and because of labor resiliency, has actually fared better than many other nations.

Celtic graves 2,000 years old have been found at Pecs, Hungary.

PILES
PAIN STOPS LIKE A FLASH!
"Piles for months. Nothing helped. Then I used 'Solex' and today I am in 1 minute. Piles soon gone." "J. C. Arley, instant relief. This is my story. Avoid knife. All druggists."

Mammoth Seaplane

Consolidated Aircraft Corporation Has Plans For 'Plane To Carry 100 Persons

Construction of a seaplane, large enough to carry 100 persons across the Atlantic ocean, will be started at Buffalo shortly, it was announced by Major R. H. Fleet, president of the Consolidated Aircraft Corporation. The 'plane, powered by 16 Curtiss Conqueror motors, will be equipped with sufficient storage tanks to carry twice as much fuel as would be needed for the ocean flight.

Passengers will be able to enjoy a 200-foot stroll along a promenade on the ship, Major Fleet said, and there will be 62 staterooms with specially constructed walls to keep out the roar of the motors.

Fine Organ In Nova Scotia Hotel

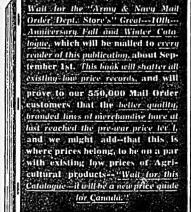

Magnificent Instrument Is Installed In New C.N.R. Hotel At Halifax

One of the most magnificent organs in Canada is a feature of the new Canadian National Railway hotel at Halifax, the Nova Scotia. It was built by Casavant Freres, St. Hyacinthe, Quebec, and is playable from a separate cabinet made by the Aeolian Company, with which Duo Art records reproduce the playing of noteworthy organists. The organ has three manuals with a range of thirty stops for the great, swell, pedal and choir. The action is electro-pneumatic.

Fine Paper Made From Rope

Paper of the most delicate kind can be made from old tarred ropes. It is used in the potteries for transferring the various patterns to the earthenware, and is so strong that a sheet twisted by hand will support a weight of one hundred pounds or more.

THREE DELEGATES APPOINTED FOR LEAGUE MEETING

Ottawa—Canada will be represented at the next meeting of the assembly of the League of Nations by Sir Robert Borden, Senator Thomas Chapais and Hon. Mrs. Mary Irene Paribay. It was announced here recently. The assembly meets in Geneva early in September, and before that there will be a meeting of the council of the league. Canada's representative on the council will be Sir Robert Borden as leader of the Canadian delegation.

Sir Robert Borden, Canada's wartime premier, has long been a staunch advocate of the league. He was one of the original signatories of the League of Nations covenant in 1919, out of which grew the league assembly and the council. Senator Chapais, who resides in Quebec, has won distinction by his historical writings. He is the author of a number of books. He was for some time professor of history in Laval University. He was a minister without portfolio in the Talbot government, in Quebec, and leader of the government in the legislative council back in 1893. He became a senator in 1919.

Hon. Mrs. Mary Irene Paribay is minister without portfolio in the Alberta Provincial Government. She represents Lacombe in the legislature. She was provincial president of the United Farm Women of Alberta, for four years. For two years she was a member of the board of governors of Alberta University. In the last two provincial general elections she has been returned as a candidate of the United Farmers of Alberta.

Canadian Butter For China

First Test Shipment Of Dairy Butter Will Go Forward On Sept. 4th

Victoria, B.C.—Close on the heels of a successful trial shipment of B.C. fresh milk to the Chinese, a word of a special order for the shipment of prime dairy butter to Hong Kong, now being arranged through the Department of Agriculture. On September 4, the first test shipment of butter within the knowledge of the department will cross the Pacific for the Far East. If the shipment is successful it will be followed by the opening of a considerable market for B.C. butter. The prospect of landing fresh dairy products from this coast has attracted wide attention in the Orient and will be developed on a most extensive scale if the results warrant it.

The butter will be shipped to Hong Kong in care of the Canadian trade commissioner at that point.

Calgary Cadets Win Trophy

High School Cadets Capture United Empire Trophy at Ottawa

Connaught Range, Ottawa, Ont.—Calgary high school cadets won the United Empire trophy, open to the cadet team making the highest aggregate score in the Tyro MacDougall, bankers and cadet matches at the Dominion of Canada Rifle Association meet here. The Calgarys scored a total of 973 points, as against 966 for Hamilton, Ont., Central College "A" team, and 963 for Winnipeg Highland Collegiate.

Infantile Paralysis In East

Oshawa, Ont.—Two deaths from infantile paralysis were reported by the health authorities here recently. The victims were Eddie Curtin, 10, and Albert W. Ferguson, the same age. No new cases have been reported by medical officials and the number now remains at 12. There has been no change in the situation in East Whitby township.

Adopt Rotary Plan

Windsor, Ont.—With the object of providing at least some employment for its members, and to tide them over the present period of depression, the local bricklayers' union is attempting to introduce a "rotary" system of employment on construction work in the border cities. Thus, each man would work one week and be idle the next.

Motion Picture Operator Killed

Edmonton, Alberta.—V. A. Crawford, Westlock, Alberta, photographer and motion picture operator, was killed instantly when his car swerved off the roadway a mile from Giviere Di Barre, and upset in the ditch. According to Alberta provincial police reports, Mrs. Crawford escaped serious injury.

W. N. U. 1851

Tribal Unrest Spreading

British Forces In India, However, Appear To Be Handling Situation Peshawar, India.—The spirit of tribal unrest appears to be spreading on the northwestern frontier, with British forces tightening the defence by increasing aerial bombing operations and rushing fresh troops northward.

Most of the Afridis who have been besieging this strategic city for a week have withdrawn under constant bombing, but meager reports from the countryside indicate that they have spread in all directions and that all branches of the tribe have taken up arms.

An indeterminate number of Drakazis have joined the Afridis, a party identified as Massozals attacked Badama Post, and the Chamankons were on the way to attack the city. The government has informed them that their own villages would be bombed unless they ceased their depredations.

Peshawar itself was quiet, and apparently most of the assaults have withdrawn under heavy bombing. On the other hand, the cantonments, however, inflicting a scattering rifle fire that did no damage. They withdrew at dawn.

Meanwhile, fresh troops arrived on an armored train from Lahore. The city gates were opened for it, but ordinary trains must stop at Nowshera and the passengers continue here by taxicab.

The six squadrons of army airplanes on duty in the sector are credited with a breaking up the plans for a mass attack on Peshawar. In one day these machines dropped 6,000 small bombs, and they have made daily attacks on various groups. As one instance they spotted the 1,500 Massozals who attacked Badama Post, and wounded 20 of them.

Will Oppose Stevens

Independent Labor Candidate Announces His Intention Of Running In East Kootenay

Canbrook, B.C.—Opposition to Hon. H. B. Stevens in the by-election in East Kootenay, where the Minister of Trade and Commerce, will be election shortly, dropped up here. William Robson, dismissed from the Provincial Labor Bureau on Monday, announced he will oppose Mr. Stevens at the by-election as an Independent Labor candidate.

Mr. Robson has been identified with Labor interests since 1889, and was formerly of Nanaimo. He has been employed with the Labor Bureau for the past seven years. Action of district Liberals will be determined at a meeting to be called within a few days.

M. McLean, of Fernie, Conservative, won the East Kootenay seat in the recent election, and resigned to make way for Hon. H. B. Stevens, defeated in Vancouver and given a portfolio in the Bennett administration.

Massey Interviews Premier

Ottawa, Ont.—Following a three-quarter hour conference between Premier R. B. Bennett and Hon. Vincent Massey, in the prime minister's office in the East Block, Bennett stated, "I asked Mr. Massey to see me and we had a very satisfactory talk." The prime minister went no further than that, and Mr. Massey, when leaving, declined to discuss the visit.

Wins Scholarship

Lloydminster, Sask.—Delbert Clarke, of Lloydminster district, graduate from the University of Saskatchewan with high honors in history and economics, has been awarded a \$500 scholarship for 1930-31, from the Canadian Pioneer Problems committee. The award was made from Queen's University, Kingston. He will study history under Prof. A. S. Morton, of the University of Saskatchewan.

Across Continent In 12 Hours

Valley Stream, N.Y.—Beating by more than two hours the transcontinental air record Col. and Mrs. Charles A. Lindbergh took from him last April, Capt. Frank M. Hawks flew from Glendale, Cal., to Curtiss Field recently, in 12 hours, 25 minutes and three seconds.

B.C. Miners Entombed

Merritt, B.C.—One man was killed and 30 are entombed as the result of an explosion in the Coalmont Colliery, Coalmont, near Princeton. Word reached here of the disaster, and plans are being considered to send men to help free the entombed miners.

Plane Saves Life

Burlington, Vt.—Anthrax antitoxin, sped here recently from Montreal by aeroplane, and dropped by parachute, saved the life of a bush-factory employee suddenly stricken with the deadly, fast working disease.

Alberta Protests

Claims That Foreign Immigrants Are Being Dumped In Province

Edmonton, Alberta.—Capt. E. M. Johnson, superintendent of the Soldier Settlement Board here, has been asked by the Department of Labor, at Ottawa, to investigate charges that 200 German immigrants were "dumped" in Alberta last week. The inquiry has been requested as the result of a telegram of protest sent to Premier R. B. Bennett by Hon. George Hoadley, acting premier of Alberta.

Denial of the allegations has been made by the steamship company concerned, and by the editor of "Der Herold," German newspaper here, but Walter Widmer, secretary of the association of German-speaking workers, insists the charges he leveled are well-founded.

UNEMPLOYMENT SURVEY IS MADE BY GOVERNMENT

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, announced recently that the government is making a survey of unemployment conditions in Canada, and that the employment service council has been called to meet here on August 21 to consider information which will have been gathered by that time.

After the council has discussed the situation disclosed, recommendations will be made for consideration of the government and will form a basis for unemployment relief measures to be submitted to parliament at the special session early next month.

In the last day or two, the minister stated, the Department of Labor has communicated with all the provinces and with the mayors of municipalities with population of 10,000 or more, asking them to advise the department as near as possible the extent of unemployment and to estimate what the situation will be this coming winter. They have been asked to send the information in within 10 days, so that the department will be able to sift the data and have it ready for the meetings of the unemployment service council.

Wheat Exports Increase

Nearly 900,000 Bushels Exported From Vancouver In One Week

Vancouver, B.C.—Nearly 900,000 bushels of wheat were exported during the past seven days, according to the weekly report of the Vancouver Board of Harbor Commissioners.

The actual total for the past week was 869,100 bushels. The export this season to date is 1,570,285 bushels, as compared with 431,698 bushels at the corresponding date last year. The elevators had in stock at 8 a.m. a total of 6,649,529 bushels, and the railways had 1,516,300 bushels on British Columbia divisions, or in terminals here. There are ships in port for 170,156 bushels.

Injured In Car Collision

London, Ont.—Hon. Donald Sutherland, Minister of National Defence; Franklin Smoke, M.P. for Brant, and J. L. Stansel, defeated candidate in Norfolk-Elgin, were slightly injured when their automobile struck a truck and overturned in a ditch.

JAP PARTY TOURS CANADA

Leading business men of Japan, arriving at Vancouver recently from the Far East, aboard the Canadian Pacific liner "Empress of Canada," received an official welcome from Mayor W. H. Malin, and representative Canadian business men during their two-day stay in the Canadian west coast port. The Japanese party is headed across Canada on a national tour. If inspection, then going on to New York to visit principal cities of the United States, return-

GLOBE CIRCLING FLIGHT ENDS IN CRASH

John Henry Mears, of New York, who took off from Roosevelt Field in globe-circling flight in an attempt to beat Graf Zeppelin time for the same trip but crashed at Harbor Grace, Newfoundland. His plane was wrecked.

Meeting Of C.M.A.

Tariff Section

Understood That Organization Is Opposed To High Duties

Toronto, Ont.—Manufacturers representing every branch of industry in Canada, were represented at the meeting of the tariff section of the Canadian Manufacturers' Association held here.

Officials of the organization declined to give out anything for publication regarding the meeting, which was the regular gathering of the section and holds all its meetings in camera.

It is understood the question of advanced duties on boots and shoes, leather goods, automobiles and other items were discussed.

The tone of the meeting is said to have been against high duties generally with a moderate increase on some Canadian lines being advocated as a help to Canadian trade and the reduction of unemployment.

The matters dealt with at the meeting will be submitted to the executive council meeting of the association, to be held after the regular meetings of the transportation, commercial intelligence, and industrial relations committees within a short time.

Liquor Restrictions

New Brunswick Regulations Aimed To Prevent Excessive Drinking

Fredericton, N.B.—A reduction restriction calculated to reduce drunkenness under the operation of the New Brunswick Liquor Control Act, has been authorized by the provincial cabinet.

The regulation states that "after conviction of selling or keeping liquor for sale, or of drunkenness, or for being found drunk twice in 12 months, a person shall not be entitled to purchase liquor for three months after conviction."

Compulsory Military Training

Wellington, N.Z.—A bill for temporary suspension of compulsory military training has been introduced in the House of Representatives by the government. It is intended as a measure of economy.

Fire Destroys Quebec Village

Property Damage Is Estimated At \$200,000

Masson, Que.—Between 500 and 600 persons are homeless, and nearly 50 houses destroyed—such is an estimate by Rev. Monsignor Routhier, parish priest of Masson, of the conflagration which swept this little town recently.

Mme. Joseph Ladame died during the afternoon and although not injured in the fire, it is believed the shock hastened her death. Property damage was estimated at \$200,000. No one was killed and no one received serious injuries in the blaze.

This well-ordered community on the banks of the Lievre River, 21 miles from Ottawa, was bawling a devastation, of a character difficult to describe. An area of over a quarter of a mile square which this morning housed nearly 120 families was simply a heap of smouldering embers. Red tongues of flame licking up from piles of charred debris spoke eloquently of the disaster which had befallen Masson.

Restrict Immigration

Dominion Government May Take Steps To Regulate Entries

Ottawa, Ont.—Indications are that steps will be taken by the Dominion Government to restrict immigration to Canada. While no official announcement was made at the conclusion of a meeting of the cabinet, it is understood that the matter of immigration was under discussion.

Any action taken, it is believed, would be aimed at the restriction of new arrivals from European countries so as not to add to the unemployed. It is rumored that the so-called railway agreements respecting immigration will not likely be renewed, especially under present provisions. A statement on the subject of immigration may be issued shortly.

SAYS JUSTICE TO ALWAYS GOVERN ADMINISTRATION

Ottawa, Ont.—Hon. Arthur Saupe, postmaster-general, in a statement declared that "justice, honesty and economy" would be his policy in administering the post office department.

The text of the statement of the postmaster reads:

"Justice, honesty, economy, such shall be my policy in the administration of the post office department. The policy which governs us shall be respected with discrimination and the regulations shall be observed with the greatest strictness.

"Racial, religious or political fanaticism shall never prevail with us. I shall continue to consider them as the most dangerous enemies of the country."

"I shall follow to the letter the policy of an honest man and a good Canadian, directed by the head of the government; a policy of peace, concord and of sound protection which will permit the rational development and utilization of all the desirable resources of our country."

"The employees who have, without reserve, conformed to the law, understood their duty in their observance of impartiality and who have impartially shown the respect due to the political authorities or their accredited representatives have nothing to fear from me."

"I shall make a distinction between the latter and those who have constituted themselves the active agents of their party or the carriers of lies and infamous calumnies. It would be unjust and cruel, for instance, to put out on the street, without reason, a good father of a family who has been in office for a number of years and who might find it difficult to work elsewhere."

"It is, I believe in the post office department that certain classes of employees are the most exposed to indulge in political partisanship."

"A careful inquiry will be made in regard to everything concerning my department, in order to avoid, as far as possible, injustices and errors. I am not inflexible but if I should commit an error, I shall do my best to repair it."

"The assurances given to me by the deputy minister, whom I have known for a long time, as well as by the heads of other branches, justify my belief that I shall be able to carry out, with success, the administration of my department."

"I also greatly appreciated the act of courtesy and deference of my predecessor, Hon. Mr. Venoit, who came joyfully to call upon me and to give me appropriately certain important information."

IS SATISFIED WITH RESULTS OF WHEAT PARLEY

Toronto, Ont.—Expressing complete satisfaction with the result of the conference of western premiers and the final conference at Ottawa, when officers of the wheat pool, the provincial premiers and Prime Minister Bennett discussed the financing of Canada's grain, Hon. J. T. M. Anderson, premier of Saskatchewan, left for Regina.

"A fine time," was his first word. "I'm perfectly satisfied with the result of our visit in the east. No, I have nothing further to say about the wheat situation; it has been pretty thoroughly done up the past two days."

"But in our last conversation you will recall I spoke of some new plans. First is the establishment of a correspondence high school course whereby children of settlers across the prairie could get the same of a high school—may take the courses by mail and write off the examinations each year at the nearest examination point."

"We hope by this that many more will be able to avail themselves of higher education than is possible at present. Along the same line we are instituting this fall the course in elementary prospecting for farmers and farmers' sons so they will be able to assist in mining development in the north."

"This falls in line with our assumption, this October first, of our own natural resources. We are planning to develop our resources to the best of our ability and will leave nothing undone which we believe should be done."

Red Menace In China

Communists Advancing Against Nanking and Other Important Points

Nanking, China.—Communists were reported advancing against this Nationalist government capital and the sister cities of Hankow, Yangtze and Wuchang, 600 miles up the Yangtze River from the sea.

This city was virtually defenceless and appeared doomed should the Reds continue their threatened attack. Few defenders remained within the 32 mile wall circling the capital, practically all troops having been drawn to fronts on which the government and northern rebels are fighting for supremacy in China.

Unrest was rampant here as peasants turned against capitalists and appeared in surrounding towns armed with rifles.

Many suspected Communists were summarily executed at Hankow. Thousands of terrified Chinese poured into the city, frightened from their outlying homes by the invaders.

Esquimos Bound For Cuba

Make Journey By Dog, Sled and Canoe From Arctic Circle To Burlington

Burlington, Iowa.—Three Eskimos and their Canadian guides who left the Arctic Circle last year and hoped to reach Cuba next, resumed their journey by canoe today, after an overnight stop at Burlington.

The Eskimos, Charles Plaininshuk and his two sons, led by Frank O'Grady, said they left the Pas, Manitoba, March 21, 1929, went to the Arctic Circle, returned to the Pas, and then set out for the south last winter by dog sled.

They continued by sled, they said, until the ice broke up. At Granite Falls, Minn., they launched their 18 foot canoe, and have travelled by the mode since. They expect to reach Havana early in 1931.

Makes Altitude Record

Regina, Sask.—Creating what is believed to be a record for western Canada, and breaking the Regina altitude flying record, P. B. Keffer, of the Regina Flying Club, climbed to an altitude of 15,250 feet over the city Tuesday afternoon, August 12. As Regina is about 1,800 feet above the sea level, Pilot Keffer actually reached the height of more than 20,000 feet.

Nebraska Tourists See West

Winnipeg, Man.—On their way to the Pacific Coast, 175 "corn huckers" from Nebraska, invaded Winnipeg en route to Vancouver. Travelling over the lines of the Canadian National Railways the "corn huckers," who are gathered from the rural population of their native state, are seeking for themselves the glories of Western Canada.

Life In the Arctic Region

Royal Canadian Mounted Police Have Plenty Of Adventures

Sailing recently on the S.S. Boethio, was a detachment of Royal Canadian Mounted Police, on route to the eastern Arctic archipelago, where they will spend two years before again returning to civilization.

Corporal Jacobs and Constables Dersch and Margetts, were the first of the detachment to reach North Sydney. They were followed by Constable Foster, of Fredericton, and later, by Inspector Joy, with the balance of the party which numbers 12 men.

The "Boethio" also carried supplies for the various Mounted Police posts in the eastern Arctic archipelago, and will bring out the members of the force which the present party is going in to relieve.

The life of the Mounted Policemen in Arctic is very adventuresome, as described by one of the party. When they reach the main supply post, they will be broken up into the members of the force which will patrol their respective routes. Each member of the force is supplied with a large snow knife, and when on the trail when making camp at night, they seek a spot where there is good pack snow, and from this, cut out blocks with which to make an igloo. These snow houses, when first made, offer no other ventilation than that which comes in through the blocks of snow, the doorway being closed up after the occupants get inside. After a while, the moisture from the breathing and also the heat from the fire, causes the ice of ice to form on both sides, and it is necessary to punch a hole through the top. They are made large enough to accommodate a man comfortable in a sleeping posture.

The food usually taken on the trail is bacon and dried caribou meat, beans, coffee, tea and sugar. They dress in fur coats similar to the Eskimos, and each of the parties has an Eskimo guide and interpreter attached. These guides acquire a position of authority among their own kind, and they are all anxious to work for the Police.

In the early days, Inuiticide was practiced by the Eskimos, when hunting was bad. This has been largely stamped out through the efforts of the police, who stock emergency relief rations at strategic points, to supply the Eskimos when times are bad.

One of the members of the party was present at the hanging of the two Eskimos who murdered one of the police, and he stated that it had a very salutary effect on the natives. The whole village gathered together, and the reason for the hanging was explained to them through an interpreter. He remarked that the Eskimos are rapidly assimilating the idea that the white man's law must prevail.

Asked if there was any lawlessness in the country, he stated that the Eskimos on the whole, were very orderly, and that if anyone broke the law, it was a very hard matter to escape punishment, particularly in cases of capital crimes, as it was impossible to get out of the country without coming in contact with one or another of the natives, and in this way, the police are able to trace the movement of the culprit.

He referred to the peculiar way in which news seems to travel in the Arctic, stating that he had had several demonstrations of the quickness with which it is carried by what is known as the "moccasin" route. Just how the news travels so quickly, is a mystery. Whether it is telepathy or some sort of signals system, the police have never been able to ascertain. In giving an illustration, he said an Eskimo had stated that a party would arrive the next day, from a place 1,500 miles distant and, sure enough, the next day, the party turned up, but as to how the Eskimo obtained this information, they were not able to find out. When asked about it, the Eskimo said: "Me no sabee, but wait, you see."

The British people have no intention of dropping the reins of empire because some of the steeds are restless.

"Can you lend me \$5?"
"I will lend you it when I come back from Paris."
"Bother! Are you going to Paris?"
"No," Gutierrez, Madrid.

W. N. U. 1861

Side Hill Cougars Are Only Myths

American Naturalist Runs To Earth Mythical Stories Told To Tourists

The side hill cougar, whose legs on the left side are worn shorter than those on his right through continual perambulations around the slope of a circular mountain and the wampus which always goes backwards up a hill and yodels like a Swiss climber when he gets to the top, after all are only myths painted by glib-tongued guides upon the credulous imaginations of visitors to the mountains.

This, at least, is the conclusion reached by Richard W. Westwood, of Washington, D.C., secretary of the American Nature Association, who, with number of members of the association, has just finished an expedition-trail trip through the mountains of Jasper Park.

"At Maligne Lake," said Mr. Westwood, on his return to Jasper Park Lodge, "we were told we would find the side hill cougar and the wampus on their home grounds. We found, however, no tracks going uphill backwards, nor any trails running in circles around the mountains."
"What we did find around the largest glacial lake in the Rockies," continued Mr. Westwood, "were chipmunks which had left their trees and lived in the ground like gophers, and seagulls which had forsaken the sea for this far inland retreat. But perhaps our most remarkable discovery was to come upon the nesting grounds of four rare birds, the Arctic horned lark, the rosy neck, the golden crowned sparrow and the timberline sparrow, all within a radius of one square mile in a meadow above the lake."

Naval Reductions

Three United States Battleships To Be Retired This Fall

Rear Admiral Hughes, chief of the U.S. naval operations, has announced that the battleships "Wyoming," "Utah," and "Florida" would be retired this fall in accordance with the terms of the London naval treaty.

Admiral Hughes said decision was reached at this time as an economical move. The gross saving to the United States is estimated at \$4,000,000 annually, but the net saving will be less since the personnel of the ships will be distributed among other vessels.

The "Wyoming" is the flagship of the fleet, Admiral Hughes said, and its place will be taken by the "Arkansas." Retirement of the three vessels will reduce the number in the fleet to 15.

Where Canada Leads

World's Largest Aerial Photographs Fleet Now In Action

Twenty-six airplanes, working in thirteen detachments, are now engaged throughout Canada in aerial photography and survey for the Dominion Government. For the past few years Canada has been the leader in the work of taking photographs from the air for map making and for aerial surveys of large areas of practically unexplored territories. This year's programme of such work has the world's largest aerial photographic fleet on the task, and it is hoped that before the end of the season another 100,000 miles of country will be recorded on photographic negatives.

Passing Of The Iron Horse

Electrification Of Railways Is Preceding Very Fast

Older generations are continually reminded that "the horse has gone." And now we are told that the "Iron Horse" is doomed.

Samuel M. Vauclain, builder of locomotives, foresees an era of intense competition between steam and electricity for the railroads. "Electrical equipment," he said in a recent speech, "is available in terms of speed and horsepower that exceeds anything that might be hoped for with the steam locomotive." And he went on to declare a belief that east of the Alleghenies the population is dense enough to warrant the electrification of the railways.

But the Iron Horse will make a determined stand. That is shown by the improvements now being made. "Wonderful as it is in speed, power and economy, the builders are now making use of roller bearings and new schemes of lubrication bound to add years to its life. Mr. Vauclain predicts that it will be a half century at least before the Iron Horse is finally knocked on the head.

But 1890 is far away, events move rapidly and Mr. Vauclain has already a natural feeling for the locomotive. Possibly the passing of the Iron Horse may be nearer by a decade or two than he predicts. But the end of the rivalry cannot be doubtful. The electric locomotive has the advantage in speed and horsepower already, and who knows how soon the adverse item of expense may be turned the other way?

But what an era that of the Iron Horse has been! How historical and romantic! Think of the long Pacific roads meeting across a continent, the golden spike driven, the two locomotives need together and the shaking of hands across the gap! No wonder the world feels an affection for the noisy, smoky, shrieking monster that has served it so well.

But we have seen the horse go, and the child now born is very likely to witness the disappearance of the Iron Horse. Some day, none can tell just when, both the animal and the steam locomotive will be curiosities in museums. It is written.—Minneapolis Journal.

Poultrymen Meet

A delegation of the Poultry Science Association, composed of teachers and investigators in poultry husbandry in the University and experimental stations of the United States and Canada, held their annual convention at MacDonald College, Montreal, recently. One hundred and fifty members attended the convention, at which papers were read dealing with phases of the poultry industry.

Real Efficiency

A man appeared in a police station and said:
"Oh, in regard to the watch I reported was stolen yesterday, I have since found that it is not lost at all."
"You are too late," replied the superintendent. "The thief has been arrested."

Central Australia is to be mapped by air photographs.

The Northward Trend

Northern Limitation Of Wheat Growing Area Is Extending

In recent weeks hundreds of Canadian settlers have joined the rush northward in Saskatchewan where thousands of acres of homestead lands have been available. Last year the number of new homesteads settled in northern regions of the province reached into the thousands and the movement has persisted in volume this season.

A few years ago northern Saskatchewan was considered little more than a wilderness of muskeg and rock. Few settlers fancied living north of 53, where early frosts were possible. But pioneers of the north have found that Reward wheat and other hardy varieties grow quickly in the well drained fields north of 53. St. Walburg has become an important railway town, Meadow Lake has been embraced by "civilization," and the wheat belt has advanced some of the best crops in the province are reported along the Big Saskatchewan.

It is significant that many of the settlers in the northern districts are seasoned farmers from the prairies, where wheat is often the staple, and the requirements and above all, the qualifications of pioneering in a new country.—Regina Leader-Post.

Will Have A Trade

Sir Esme Howard, British Diplomat, To Take Up Bookbinding Craft

After thirty-six years in the British diplomatic service Sir Esme Howard says:
"I am terribly tired of the sound of my own voice."

At the age of 66 he has decided to go to Italy and learn how to bind books.

"Unfortunately," says Sir Esme, "I never learned any handicraft. I hope now to make good this defect and become a bookbinder. Even if bookmaking is a small thing, I console myself by saying that to have bound one book really well is to have added to the stock of beautiful things in the world."

These few words reveal a philosophy simple and esthetic and satisfying. This world has been happiest when great numbers of men worked eagerly with their hands as laborers of love.

A Manufacturing Centre

Calgary Occupies A Prominent Place As An Industrial City

Only seven cities in Canada produced goods, in 1928, with a higher gross value than Calgary (at \$42,418,079), according to the annual report on general manufactures issued by the Dominion Bureau of Statistics and received by D. E. Black, chairman of the Alberta Development Board, southern section. The cities having a higher gross output were: Montreal, \$554,311,571; Three Rivers, \$45,441,169; Quebec, \$44,608,105; Toronto, \$505,444,323; Hamilton, \$196,262,255; Ottawa, \$84,894,222; Winnipeg, \$61,612,232; Kitchener, \$50,117,175; London, Ontario, \$48,337,680; Vancouver, \$94,131,698.

Benjamin Franklin attended school only about two years—between the ages of eight and ten.

Language Spoken By Prince

Accent Of The Prince Of Wales Has Been Changed By Extensive Travels

The Prince of Wales does not speak the King's English. That is to say, the heir to the British throne has developed an entirely independent pronunciation different from that in vogue in the royal circle of Buckingham Palace, or the upper strata of aristocratic London society.

In the first place, the prince talks more rapidly than his father or anyone else belonging to the older generation. He does not talk slang, however, although he knows all the words.

The change in the prince's pronunciation and accent was observed by F. G. Blandford, England's best known authority on pronunciation, in a lecture to the Cambridge University local lecturers. Mr. Blandford declared that there was a general and widespread change in the pronunciation in the realm, and he cited the Prince of Wales as a typical example.

The prince's wide travels through America, Canada and Africa are thought to have influenced his speech considerably. One of the things he astonished his parents with upon his return from the American trip was the expression, "I guess so."

The prince has never been an adept at the once so fashionable and highly artificial Oxford accent, with its affected drawl and note of superciliousness and haughtiness. His intonation comes nearest to that of Canadian Canadians, and which is distinguishable from the somewhat nasal Yankee speech.

As for his vocabulary, he has a remarkable knack of conforming to the speech of those conversing with him, no matter in what part of the English-speaking world he may find himself. He knows, for instance, that to call a man a "good grater" is a term of compliment in Australia, while it would amount to an insult on the North American continent.

His French incidentally has a slight trace of accent. This is not looked upon as a fault by any means. In this respect he is right in line with the standard set up by a famous British diplomat who held that a gentleman should never speak French well enough to be taken for a Frenchman. The King's younger son, however, does not subscribe to this theory. He speaks French faultlessly in the manner of the French-Canadian.

Hotel For Lisbon

British May Erect A Fine Modern Hotel In Lisbon, Portugal

The project for erection of a de luxe hotel in Lisbon is being considered by a British syndicate, which recently sent two representatives to survey possible sites.

These were Arthur Tester, representing the financial end of the business, and Robert Eichenbroyer, a German architect.

In case the hotel project is carried through, it will be erected in the Edward VII. Park, and will contain about 420 rooms. It probably will be four stories high, and the estimated cost is 350,000 pounds sterling.

The hardest and heaviest wood in the world comes from the tropics, while the softest and lightest comes from the temperate.

Automobiles And Railways

Motor Car Making Inroads On Railway Traffic In States

William Lyon Phelps, of Yale University, writes in the New York Evening Post as follows:

In all the bewildering changes of modern life, none is more striking than the change in transportation. As Charles Merz has pointed out, Henry Ford has put the American world on wheels. To see the main street in every town and village choked with automobiles has become so familiar a spectacle that it is only with an effort we remember how recent is this transformation.

In an enormous number of American towns, the sidewalks are being narrowed in order that there may be more room for parking motor cars. Nobody walks any more.

The automobiles have played the deuce-and-all with railways; in the Thumb of Michigan, where I live in the summer, passenger trains have been almost entirely withdrawn, because they do not pay. And this section is a fair sample of what has happened elsewhere.

On the other hand, through trains for long distance have been improved, both in speed and in luxurious equipment; from Boston to New York, to Philadelphia, to Washington, to the South, the trains are faster and better; the same is true of westward express.

I shall be glad when omnibuses supplant trolley cars, and the ugly tracks are removed from city streets and country highways. Furthermore, in the city there is nothing that makes more noise than a trolley car, except two trolley cars.

Gold Rush In Australia

Discovery Of Gold Nugget Creates Much Excitement

Discovery in Australia of a 30-ounce gold nugget at Transgulla, Victoria, has started a new gold rush.

More than 250 prospectors, most of them driving cars, have already reached the field and pegged out claims.

Australia today was in the throes of the greatest gold fever in many years. Seven expeditions with full transport equipment, including airplanes, trucks, and camel caravans, the prospectors backed by many thousands of dollars and their outfits staffed by experienced prospectors, have been fitted out for penetration of the waste areas where traces of gold have been found. Hostile bushmen already have caused considerable trouble for some of the prospectors.

The prospectors are looking particularly to what is known as the centre of Australia, an area about 1,000 miles square. This district, which is virtually unexplored, is believed to contain rich mineral areas.

Discovery of the Transgulla nugget created a tremendous interest in the Australian gold fields.

One expedition, led by Donald McKay, noted Australian prospector, has just returned from Central Australia, where it made an extensive airplane survey. Mr. McKay brought back to Sydney maps and other data he collected for use in further prospecting.

Automatic Phones For London

London's plan to have only automatic telephones is making steady progress, and millions of dollars will be spent on the work. The ultimate number of automatic exchanges, serving about 750,000 telephones, is 150. In Britain there are already 330 automatic exchanges, and last year's expenditure on telephone development was \$47,500,000.

Mr. Goodpaster—"You are getting on in years. You should turn your thoughts toward heaven."
Mr. Oldsmith—"On the contrary, I am thinking of getting married again."

Half of the world doesn't know how the other half lives—but, oh, how they would like to find out!

Hungary now has 25,000 shoe and boot makers owning small shops.

Paris' automobile Salon will be held in October.

"You want me to go and work with you? Have you a watch?"
"No."

"Then how on earth will we know when we're thirsty?"—Pages Galos, Yverdon.

LANDING OF THE ENGLISH DIRIGIBLE R-100 AT ST. HUBERT AIRPORT, MONTREAL

The photograph reproduced above shows highlights of the actual landing of the English dirigible R-100, after her long historic voyage from Cardington, England. A striking view of the great airship in position, snugly made fast by the nose to the giant tower at St. Hubert Airport, Montreal, after the ground crew and skilfully handled her arrival.

ENO'S FRUIT SALT

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

CHAPTER XXVI

On a morning in August Charmian unlocked the door into what had so recently been John Carter's office, and opened the casement wide. The door was no longer covered by the soft Bohemian; the windows were bare of hangings; the bookshelves empty. Only the tall brass andirons gleamed a welcome from the blackened hearth; and the girl wiped the dust from Great-grandfather Davis's old chair, and looked appraisingly at her surroundings.

As she did so a brisk step sounded on the sidewalk, and in another moment the doorway was blotted out by George K.'s ample figure.

"What you up to this morning?" he questioned genially. "Saw the door wide open, and thought I'd take a look. Kind of bare, isn't it, since your doctor departed? But it's a pretty place in spite of that."

"Come in," smiled Charmian. "You're the one person in Wickfield I want to see."

"You flatter me," replied George K., and smiled.

"Sit down," she said. "This is the only chair, but I'll perch on the desk if you don't mind. Uncle George, I'm sick with indecision on a lot of subjects; but one thing's clear: I've got to give up the school."

"I've been expecting that," the banker responded. "Only last night Salina was saying that Grandmam—"

He hesitated; but Charmian asked bravely: "Then others have seen it, too?"

George K. nodded, and the girl went on: "She's failed this summer—not in her mind, thank heaven! but she's not so brisk and happy as she was a year ago. I've got to be with her more. It was hard last winter,

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

W. N. U. 1851

was what attracted the young man. Don't lose sleep over that. Now I must run in and speak to Grandma Charmian—" George K. turned as he reached the door. "What's the matter with John Carter? Salina says the life has gone out of his step in the last month. Have you broken his heart?"

Charmian smiled.

"I have an uncomfortable feeling that the consensus of opinion in Wickfield is that he has broken mine!"

"He hasn't—has he?"

George K. looked so genuinely solicitous that the girl said quickly: "What nonsense!—though if he had I wouldn't admit it for a kingdom. As Grandma frequently remarks, 'we Davises have our pride.' The only thing that's breaking my heart, Uncle George, is the thought that I haven't been clever enough to keep the Davis household in the family. As for John Carter, if the life has gone out of his step, I'm truly sorry. He dropped in yesterday when I was at the library, and Grandma said he looked abominably tired. I'll run into his office this afternoon with an imaginary ache, and see what I can do about it. I'd brave even the Wickfield gossip to help as a good friend as he has been to us."

"Well, so long," smiled the banker. "I'll let you know what I hear from your purchaser, my dear."

Charmian stood at the window watching him cross the driveway and disappear under the golden pineapple. "I believe," she mused, "that the whole thing will be easier now it's settled. This will make a darling living room. Grandma will get a better view of the street from this window than from the old one. I can sleep on a couch in here, and Grandma can have the other room. Of course it's the only thing to do! Why, hello! where did you come from?"

This question was addressed to John Carter, who stood, as George K. had an hour earlier, in the doorway. At Charmian's greeting he came forward, tossed his hat onto the desk, and answered: "I couldn't resist the lure of that open door. I never pass here, Charmian, without a homesick twinge. Never again shall I have an office that so exactly suits me; and I miss you and Grandma more than you'd guess. You see, there's not enough sickness this time of year to keep me from thinking of things that had better be forgotten. Well, let's forget 'em!" he said more cheerfully. "What brought you here this morning, may I ask?"

Charmian told him, adding that the old doctor had made the plan for her; and that George K. had a purchaser for the house.

"So you see," she ended, "everything's done—except telling Grandma. I admit that I can't quite face the thought of that ordeal."

The young man looked very serious as he replied: "Let me tell her, Charmian. I'm hardened to breaking unpleasant truths to people. Besides, unless I'm mistaken, Grandma is fond of me. I can break the news as painlessly as you can."

He was seated on Great-grandfather Davis's old desk, and the girl looked up at him from the chair, her blue eyes misting.

"John Carter, I ought to be ashamed! I don't believe a girl ever had such friends before. Here's Uncle George wanting to give me an allowance as I needn't sell the place; and you—Well, I hope some day I can repay you for all you've done for us."

"Before Her Baby Came"

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catharines, Ontario.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham, Med. Dir., Lynn, Mass. U. S. A. and Canada, Ontario, Canada

SCIATICA?

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. Do you relieve; they don't do any harm. Just make sure it's genuine.

ASPIRIN

TRADE MARK REG.

and been to this year. But I guess I'll have to tell Grandma myself. It seems, somehow, as if I ought to; but if my courage deserts me at the last moment I'll make an ignominious retreat and send for you. Now that's enough of my troubles for one day. Let's hear yours for a change."

Late that afternoon when Charmian returned from a call at the Morris', she found Grandma, bright-eyed, at the window.

"I've been being gallivanting," she explained as the girl kissed her. "Just after you started, along came the doctor and made me go for a ride. We've been clear to Eastboro, and I don't feel one mite tired. I will say that his car's a sight more comfortable than Edward Howe's was."

"I'm glad you've had such a good time," smiled Charmian. "Mrs. Merry has a new picture of the baby; and Magda wrote that she'd send me another view. He's terribly cunning—looks for all the world like a miniature George. What do you want for supper, Grandma? It's almost time."

(To Be Continued.)

New Northern Air Route

From Scotland To Winnipeg By Air Seems a Possibility

The leader of the British Arctic Air Route Expedition, H. G. Watkins, makes out a good case for air travel from Scotland to Winnipeg by way of Greenland. On the route lie the Faroe Islands and Iceland, and nowhere are there more than three hundred miles of water to be flown. There are, of course, the handicaps of fog and the Greenland ice cap with its menace to aviators by way of Greenland. On the other side of flying conditions between the Faroes and Iceland. The expedition will winter in Greenland, spending their time on the highest part for meteorological research. Canada will be expected to supply details about the crossing of Davis Strait and Baffin Land, and the feasibility of a route thence to Southampton Island, Hudson Bay, down to Fort Churchill, and thence to Winnipeg. Mr. Watkins predicts that they will do "novel and exciting work" in Greenland. And it is the famous ice cap presents no serious obstacle to aviators, the prospects for an air route from Scotland to Winnipeg will begin to look bright.

—New Outlook.

Island Disappears

Volcanic Disturbance Causes Island To Sink Beneath Sea

A despatch from Java says the island of Anak Krakatau, or translated into English, Child of Krakatau, which recently had a height of 10 feet, recently disappeared beneath the surface of the sea during intense activity of nearby Krakatau volcano which is throwing out fountains of fire.

From May to August, 1883, there occurred there probably the most tremendous volcanic eruptions of modern times, by which two-thirds of the island was completely swept away. A gigantic wave was formed by which 20,000 people perished, the wave propagating itself as far away as the English Channel.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Expectorator to give relief. Its effects are sure and lasting.

Shortage Of Radium

Radium supplies in the Congo may decrease rapidly owing to the exhaustion of the ore, according to a Johannesburg, South Africa, newspaper, which declares its information is from a reliable source. The result, it is predicted, will be a radium famine with the present price of \$60,000 a gramme being doubled or trebled within a year or two.

Wood Menace

The time of year has arrived when a real blow can be struck at the weed menace. After-harvest cultivation is one of those oldtime methods that should be revived.—Farmers' Advocate.

Minnard's Liniment removes Warts, relieves Bunions.

English Boy Scouts To Visit Jasper

Will Spend Six Weeks In Roughing It Over Mountain Trails

With three "billy cans" and two saucapans, home made tents and rubber ground sheets, and only two blankets apiece, 16 members of the 9th troop of Boy Scouts, Leeds, England, passed through Winnipeg recently over the lines of the Canadian National Railways for Jasper National Park, where they will spend six weeks in "roughing it" over the trails of this famous game sanctuary. The boys, who are all pupils of the Leeds Modern Grammar School, are in charge of Dr. G. F. Norton, headmaster of the school, and arrived in Canada on the S.S. Megantic. After visiting Ottawa, they took train for the west and, enroute, have cooked their own meals, used their own blankets and made up their own tents.

When the boys arrive in Jasper, they will leave the main roads and hike into the back country, carrying their food on their backs. Tentative trips have been planned to the Maligne Lake district and to the famous Columbia Ice Fields. Possibly a climb of Mount Edith Cavell may be attempted, as there are a number of enthusiastic alpinists in the party and, although the main object of the visit is to explore the districts not generally visited by tourists, a day or so may be set aside for the ascent.

On leaving Winnipeg, the boys were eagerly looking forward to a period of "real roughing it" in the Canadian Rockies.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Radio Announcer Is

Made Indian Chief

First Radio Announcer In the World To Be Appointed Indian Chief

The first radio announcer in world to be appointed chief of an Indian Tribe is George Wright, of CNR, the Vancouver broadcasting station of the Canadian National Railways. Wright has been made a chief of the Squamish Indians, and given the title of Chief Sa-Saygo-Sa-Nay-Chim which, translated, means Chief Flying Voice. The honor was conferred upon Wright for his assistance in calling to the dying chief of the tribe a daughter who was some hundreds of miles away in a remote section of British Columbia. The last request of the chief was that his daughter be brought to see him.

The museum of comparative zoology, of Harvard, recently received a collection of about 8,000 Hymenopterous insects from Chile.

Little Helps For This Week

"Lead us not into temptation."—Matthew vi. 13.

Ah! He who prayed the prayer of all mankind Summed in those few, brief, words the mightiest plea. For erring souls before the courts of heaven—Save us from being tempted—lest we fall.

—Oliver Wendell Holmes.

"The petition of 'Lead us not into temptation' is the prayer of Christian humility, conscious of its own weakness. If this prayer is truly offered, it may supersede the necessity of temptation. If we are already conscious of our weakness, we may not need the trial which is sent to show us our weakness."

—James Freeman Clarke.

Minnard's Liniment for Lumbago and Neuralgia.

One Thing At a Time

Auto Driver Finds He Cannot Attend To Two Things At Once

"I at first don't succeed, try it later."—Revised by E. F. Gillis, of Evanston, Ill.

Gillis, driving home, attempted to light a cigarette. Pulling out his mechanical cigar lighter he snapped it. It clicked, but there was no spark, no flame. Changing hands, he tried again with the same result. Then he tried both hands, holding one over the lighter to protect the flame, if any. He gave a vicious push with the other hand.

He regained consciousness in a hospital, where they told him he had run into a tree, that he still held the lighter when they pulled him out, and that he would recover.

Gyproc Makes Summer Homes FIRE-SAFE!

PROTECT your family by making your Summer home draught-proof, dust-proof and fire-safe. The new ivory coloured Gyproc, that does not burn will render you this service at small cost.

Use it for structurally strong walls, ceilings and partitions. It needs no decoration (when panelled) but you can tint, paper or plaster it if you wish. It is easily and quickly applied, is a permanent asset, and is vastly superior to other building materials.

Your dealer's name is listed below. Ask him today for full information on Gyproc Wallboard or send for interesting free book "Building and Remodelling with Gyproc."

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Migratory Birds

Convention Act

A summary of the Migratory Birds Convention Act is given below. This is the law which is based upon the treaty with the United States. Any enquiries concerning this law may be addressed to the Commissioner, National Parks of Canada, Department of the Interior, Canada.

OPEN SEASONS

Saskatchewan: Ducks, Geese, Coots, Wilson's or Jack-snipe, Sept. 15 to Dec. 31, both dates inclusive.

Alberta, north of the Clearwater and Athabasca Rivers, Sept. 1 to Dec. 14. South of the Clearwater and Athabasca Rivers, Sept. 15 to Dec. 14.

CLOSED SEASONS

There is a closed season in the provinces of Saskatchewan and Alberta on swans, wood duck, eider duck, cranes, curlew, willet, godwits, upland plover, black-bellied and golden plover, greater and lesser yellow legs, avocets, dowitchers, knots, oyster catchers phalaropes, stilts, surf-birds, turn stones, and all the shore birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds: Auklets, auks, bitterns, fulmars, gannets, grebes, guillemots, gulls, herons, jaegers, loons, murrets, petrels, puffins, shearwaters and terns; and there is a closed season throughout the year on the following insectivorous birds: bobolinks, catbirds, chickadees, cuckoos, flickers, flycatchers, grosbeaks, hummingbirds, kinglets, martins, meadowlarks, nighthawks or bullbats, nuthatches, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, waxwings, whip-poor-wills, woodpeckers and wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest migratory birds during the closed season. Sale of these birds is for bidden.

The killing, capturing, taking, injuring or molesting of migratory insectivorous and migratory non-game birds is prohibited. The possession of migratory game birds killed during the open season is allowed in Alberta until March 31 following the open season, and in Saskatchewan until the last day of February following the open season.

DAILY BAG LIMITS

Saskatchewan: Ducks and geese, 30 of all kinds in one day, but not exceeding 10 geese, and 150 of all kinds in a season but not in excess of 30 geese, 25 coots and 15 wilson's snipe.

Alberta: Ducks, 30 in one day and not more than 200 of all kinds in a season; geese 15, coots 25, wilson's snipe 25.

GUNS AND APPLIANCES

The use of automatic (auto-

loading), swivel or machine guns, or battery, or any gun larger than number to gauge is prohibited, and the use of any aeroplane, powerboat, sailboat or night light, and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

PENALTY

Every person who violates any provision of this Act or any regulation shall, for each offence, be liable upon summary conviction to a fine of not more than three hundred dollars and not less than ten dollars, or to imprisonment for a term not exceeding six months, or to both fine and imprisonment.

Aimee Semple McPherson must find the going rather rough in her business just now. She is forced to put over another sensational publicity stunt.
